Old software stack

The old (Vital-IT) software stack can be accessed on Curnagl via the following commands

```
$ source /dcsrsoft/bin/use_old_software

################################
#                              #
#  WARNING - USING OLD SOFTWARE  #
#                              #
################################

$ module load Bioinformatics/Software/vital-it
```

Please note that the old stack is not updated, no new tools can be added and there is no guarantee that it will work.
