What projects am I part of and what is my default account?

In order to find out what projects you are part of on the clusters then you can use the `Sproject` tool:

```
$ Sproject

The user ulambda ( Ursula Lambda ) is in the following project accounts

   ulambda_default
   ulambda_etivaz
   ulambda_gruyere

Their default account is: ulambda_default
```

If `Sproject` is called without any arguments then it tells you what projects/accounts you are in.

To find out what projects other users are in you can call `Sproject` with the `-u` option

```
$ Sproject -u nosuchuser

The user nosuchuser ( I really do not exist ) is in the following project accounts
..
..
```
