News and events management inteface

1. List of predefined searches

Each user has a list of predefined searches based on their profile. These searches are:

- My News/Events: list of news/events entered by the user
- My subscriptions: list of news/events from channels to which I have subscribed
- My validations: list of items awaiting validation
- My channels: list of items published in channels for which the user is a validator

2. General actions

Each user has actions based on his/her profile. These actions are:

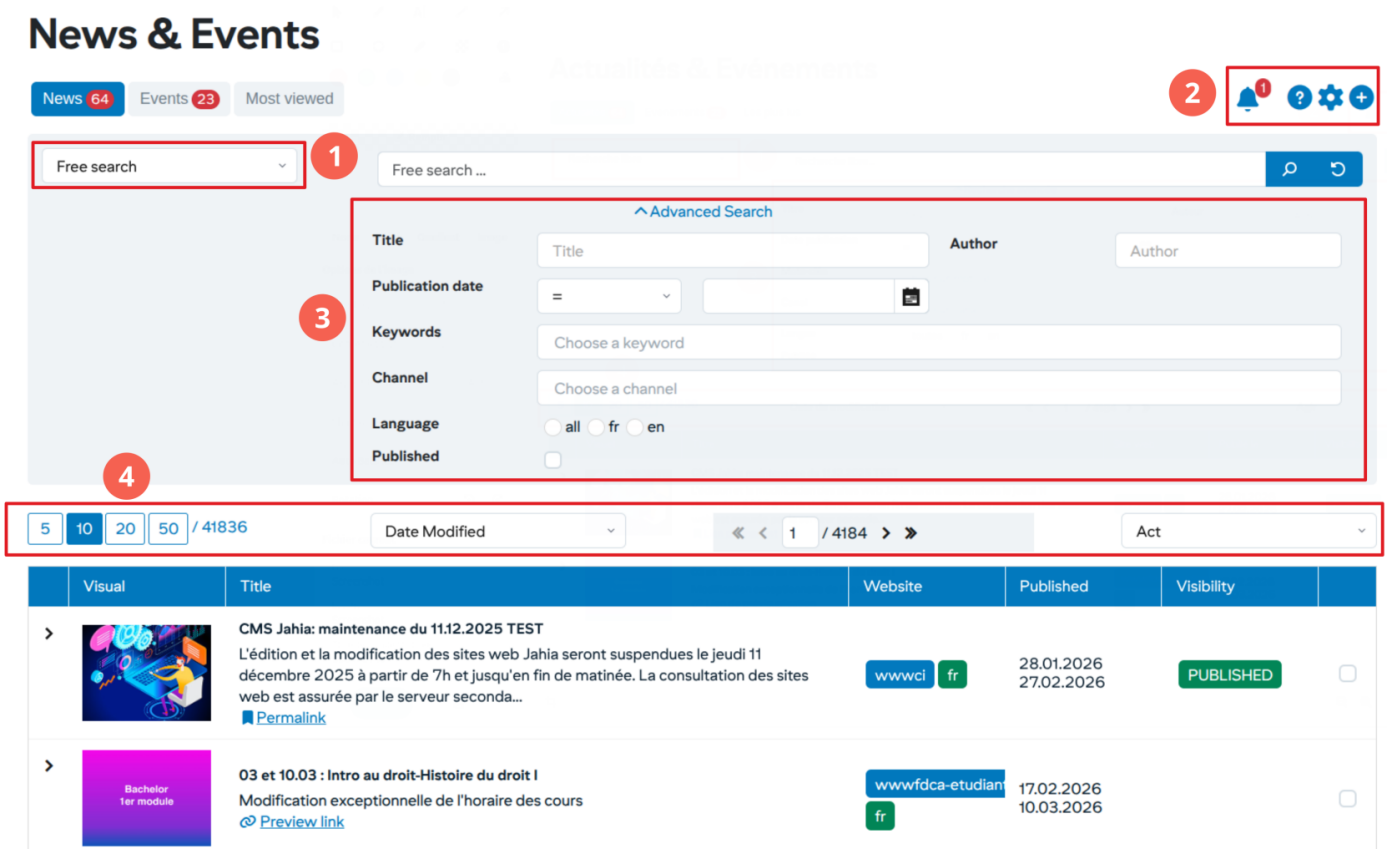

- Subscribe to news channels
- Add items (news, events)

3. Advanced search

An advanced search is available by default.

4. Navigation

Users can filter and sort search results according to their needs.
Validators can also launch grouped actions on search results. These actions are:
Delete/Relay/Propose selected list.
