

Software to access S3 bucket

From Curnagl cluster (command line tools)

Rclone

awscli

From your laptop or a workstation

Command line tools

Following the official documentation, you can install Rclone (<https://rclone.org/install/>) or awscli (<https://docs.aws.amazon.com/cli/latest/userguide/getting-started-install.html>) on your laptop/workstation.

Then both tools can be used as described in the above part dedicated to use from Curnagl cluster.

Cyberduck

Cyberduck can be installed from <https://cyberduck.io/download/>.
