

# How do I know who has access to my videos?

To find out who has access to your videos, you need to **look at the permissions for the channel** where your video is located. Follow the instructions on [this page](#) to find out how to access the permissions of a channel.

You can also **set permissions for each video individually**. Follow the instructions on [this page](#) to find out how to change the permissions of your videos.

If your channel (or sub-channel) is linked to a Moodle course, everyone enrolled in the Moodle course will also have access to the videos in your channel.
