

My live stream has no sound. What should I do?

Make sure you are **equipped with a microphone** and that it is **turned on**.

In rooms with fixed microphones (e.g. Geopolis), make sure you **stay behind the lectern** and **do not move around in the room**.

Some microphones have a **low volume by default**. Also, it is sometimes necessary for spectators to **turn up the video and/or computer volume to high levels** to hear the video.
