

Prevent submission changes in an Assignment

In the case of a digital exam based on an *Assignment*, exam papers can be modified up to the cut-off date set in the *Assignment*. A student who leaves the examination room early, after submitting his or her assignment, may still be able to modify his or her work between now and the end of the examination.

When a student leaves the exam room early, the student must be prevented from modifying the work.

Preventing changes to student work

1. First, go to the Submissions page.

Résumé de l'évaluation

Caché pour les étudiants	Non
Participants	254

2/3. Then, using the name filtering tools, find the student's work in the list of submissions.

4. Next to the Grade button, click on the **"Modify" option**.

5. In the drop-down list, click on "Prevent submission changes".

The screenshot shows the 'Travaux remis' page in MoodleExam. At the top, there's a search bar for 'Prénom' and 'Nom de famille' (labeled 1 and 2). Below this is a table of submissions. The table has columns: Sélectionner, Avatar utilisateur, Prénom / Nom de famille, Numéro d'identification, Adresse de courriel, Statut, Note, and Modifier. The first row shows a submission by 'EP' with the name 'Etufbm1 Portal_t' (labeled 3). The 'Statut' is 'Remis' and the 'Note' is 'Évaluer'. The 'Modifier' dropdown menu is open (labeled 4), showing options: 'Modifier la note', 'Empêcher l'ajout et la modification de travaux' (labeled 5), and 'Octroyer une prolongation'. The second row shows a submission by 'EL' with the name 'Etufbm1 Portal_t' and a status of 'Remis pour évaluation' with a note of '3,00 / 6,00'.

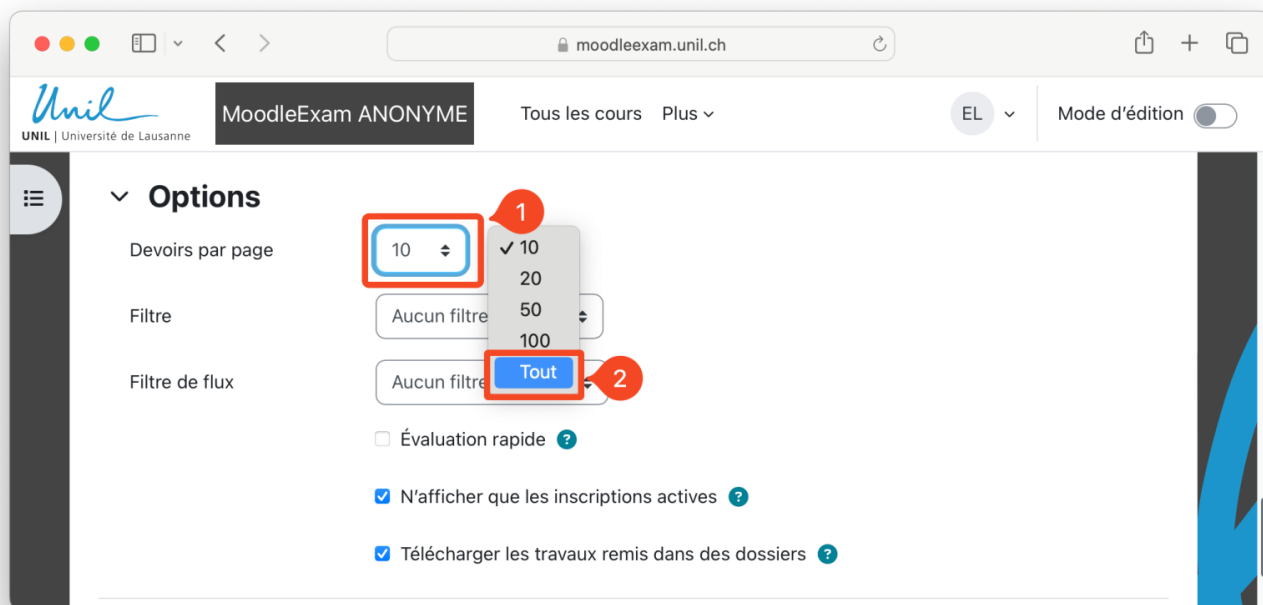

6. That's it, the student's work is now locked. They will not be able to change it.

The screenshot shows the 'Travaux remis' page after the submission has been locked. The 'Statut' column for the first submission is now 'Devoir verrouillé' (labeled 1), indicating the work is locked. The 'Note' column still shows 'Évaluer'.

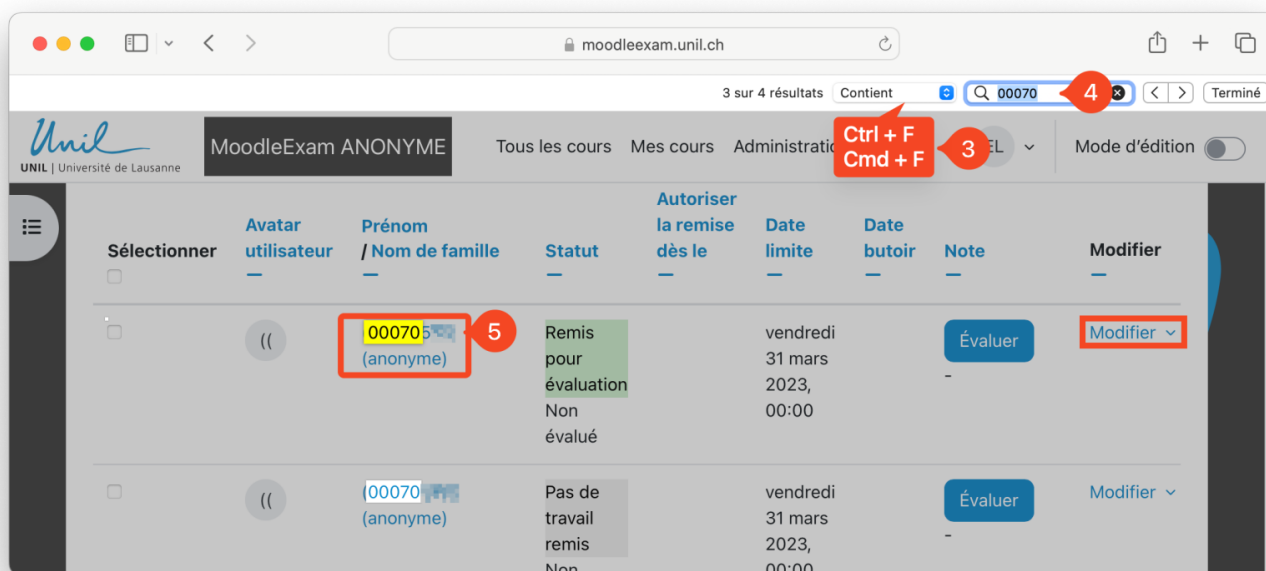

For anonymous exams

For anonymous exams, it is impossible to search for a student's work by first and last name. To make it easier for you to find the student's work, go to the bottom of the Submissions page. In

Assignments per page, select "All".

Then open the Search function (shortcuts: ctrl + F on Windows or cmd + F on Mac) in your browser. Enter the student number. The student's work will be highlighted. Check the student number, then follow the procedure described above.
