

Searching IRIS

Start your search

From the IRIS homepage, you can begin a search in two ways:

1. By clicking the search icon: type your keyword and press the Enter key on your keyboard.
Note: This option is available from any page within IRIS.
2. By clicking directly into the search field: enter your keyword, then click “Search.”

Both methods allow you to search across the entire repository, covering all entities (people, publications, units, and journals).

Filters and settings

Once your search is launched, you'll automatically be redirected to the search results page. A series of filters allows you to narrow down the results, including:

1. Entity: people, publications, units, or journals
2. Linked person: a person associated with the publication (not necessarily the author)
3. Author
4. Publication date
5. Type of publication
6. Journal or magazine name
7. File presence: with or without
8. Language of the publication
9. Keywords
10. Linked unit
11. Institution: UNIL/CHUV/Unisanté + partner institutions or external

The screenshot shows the IRIS search interface. On the left, a sidebar titled "Filters" contains a list of filter categories, each with a plus icon: Entity, Linked person, Author, Date, Type, Journal, With file(s), Language, Keywords, Unit, and Institution. This sidebar is highlighted with a red rectangular box. Below the filters is a button labeled "Reset filters". The main area is titled "Search Results" and shows "Now showing 1 - 10 of 1839". At the top of the main area is a search bar with "All of IRIS" and "Notice" selected, and a "Search" button. The search results list three items, each with a book icon. The first item is a "Publication" titled "Notices et éditions des leçons inaugurales au Collège de France de Joseph Bédier, Edmond Faral, Mario Roques (seulement **notice**) et Félix Lecoy". The second item is a "Journal" titled "Monthly **Notices** of the Royal Astronomical Society: Letters". The third item is a "Publication" titled "Blue compact dwarf galaxies and new velocities in Virgo". At the bottom right, there are social media sharing icons for Facebook, Twitter, LinkedIn, Email, and Print.

To reset the filters, simply click “Reset filters.”

This screenshot shows the same IRIS search interface as the first one, but with a different highlight. The "Reset filters" button at the bottom of the filters sidebar is now highlighted with a red rectangular box. The rest of the interface, including the search bar, results list, and social media icons, remains the same.

You can also choose to limit your search to a specific collection. To do so, click into the search bar and select the desired collection.

Search by collection

Another way to refine your search is to start directly from a specific collection. From the homepage, click on the collection you're interested in.

You'll then be redirected to the collection-specific search page, where you can enter your keyword in the search field.

The search results page will look similar, but the filters displayed will vary depending on the selected collection.
